

This attachment contains the two most recent Senior Officer Fee Summaries for the Fund.

THE FOLLOWING IS NOT PART OF THE SHAREHOLDER REPORT OR THE
FINANCIAL STATEMENTS

SUMMARY OF SENIOR OFFICER'S EVALUATION OF
INVESTMENT ADVISORY AGREEMENT¹

The following is a summary of the evaluation of the Investment Advisory Agreement between AllianceBernstein L.P. (the "Adviser") and the AllianceBernstein Trust, Inc. (the "Trust") in respect of AllianceBernstein Global Value Fund (the "Fund").² The evaluation of the Investment Advisory Agreement was prepared by Philip L. Kirstein, the Senior Officer of the Fund, for the Trustees of the Fund, as required by a September 2004 agreement between the Adviser and the New York State Attorney General (the "NYAG"). The Senior Officer's evaluation of the Investment Advisory Agreement is not meant to diminish the responsibility or authority of the Board of Trustees of the Fund to perform its duties pursuant to Section 15 of the Investment Company Act of 1940 (the "40 Act") and applicable state law. The purpose of the summary is to provide shareholders with a synopsis of the independent evaluation of the reasonableness of the advisory fees proposed to be paid by the Fund which was provided to the Trustees in connection with their review of the proposed approval of the continuance of the Investment Advisory Agreement. The Senior Officer's evaluation considered the following factors:

1. Advisory fees charged to institutional and other clients of the Adviser for like services;

¹ The information in the fee summary was completed on April 25, 2014 and discussed with the Board of Trustees on May 6-8, 2014.

² Future references to the Fund do not include "AllianceBernstein." References in the fee summary pertaining to performance and expense ratio rankings refer to the Class A shares of the Fund.

2. Advisory fees charged by other mutual fund companies for like services;
3. Costs to the Adviser and its affiliates of supplying services pursuant to the advisory agreement, excluding any intra-corporate profit;
4. Profit margins of the Adviser and its affiliates from supplying such services;
5. Possible economies of scale as the Fund grows larger; and
6. Nature and quality of the Adviser's services including the performance of the Fund.

These factors, with the exception of the first factor, are generally referred to as the “*Gartenberg* factors,” which were articulated by the United States Court of Appeals for the Second Circuit in 1982. *Gartenberg v. Merrill Lynch Asset Management, Inc.*, 694 F. 2d 923 (2d Cir. 1982). The first factor is an additional factor required to be considered by the AoD. On March 30, 2010, the Supreme Court held the *Gartenberg* decision was correct in its basic formulation of what §36(b) requires: to face liability under §36(b), “an investment adviser must charge a fee that is so disproportionately large that it bears no reasonable relationship to the services rendered and could not have been the product of arm’s length bargaining.” *Jones v. Harris Associates L.P.*, 130 S. Ct. 1418 (2010). In the *Jones* decision, the Court stated the *Gartenberg* approach fully incorporates the correct understanding of fiduciary duty within the context of section 36(b) and noted with approval that “*Gartenberg* insists that all relevant circumstances be taken into account”

and “uses the range of fees that might result from arm’s-length bargaining as the benchmark for reviewing challenged fees.”³

FUND ADVISORY FEES, NET ASSETS, & EXPENSE RATIOS

The Adviser proposed that the Fund pays the advisory fee set forth in the table below for receiving the services to be provided pursuant to the Investment Advisory Agreement. The fee schedule below, implemented in January 2004 in consideration of the Adviser’s settlement with the NYAG in December 2003, is based on a master schedule that contemplates eight categories of funds with almost all funds in each category having the same advisory fee schedule.⁴

<u>Fund</u>	<u>Category</u>	<u>Advisory Fee</u>	<u>Net Assets 03/31/14 (\$MIL)</u>
Global Value Fund	International	0.75% on 1 st \$2.5 billion 0.65% on next \$2.5 billion 0.60% on the balance	\$46.6

The Adviser is reimbursed as specified in the Investment Advisory Agreement for certain clerical, legal, accounting, administrative and other services provided to the Fund. During the Fund’s most recently completed fiscal year, the Adviser received \$48,627 (0.113% of the Fund’s average daily net assets) for such services.

Set forth below are the Fund’s total expense ratios for the most recently completed fiscal year:

³ *Jones v. Harris* at 1427.

⁴ Most of the AllianceBernstein Mutual Funds, which the Adviser manages, were affected by the Adviser’s settlement with the NYAG.

<u>Fund</u>	<u>Total Expense Ratio</u>		<u>Fiscal Year End</u>
Global Value Fund	Advisor	1.89%	November 30
	Class A	2.19%	
	Class B	2.94%	
	Class C	2.91%	
	Class R	2.45%	
	Class K	2.16%	
	Class I	1.84%	

I. MANAGEMENT FEES CHARGED TO INSTITUTIONAL AND OTHER CLIENTS

The advisory fees charged to investment companies which the Adviser manages and sponsors are normally higher than those charged to similar sized institutional accounts, including pension plans and sub-advised investment companies. The fee differential reflects, among other things, different services provided to such clients, and different liabilities assumed. Services provided by the Adviser to the Fund that are not provided to non-investment company clients and sub-advised investment companies include providing office space and personnel to serve as Fund Officers, who among other responsibilities make the certifications required under the Sarbanes–Oxley Act of 2002, and coordinating with and monitoring the Fund’s third party service providers such as Fund counsel, auditors, custodians, transfer agents and pricing services. The accounting, administrative, legal and compliance requirements for the Fund are more costly than those for institutional assets due to the greater complexities and time required for investment companies, although as previously noted, the Adviser is reimbursed for providing such services. Also, retail mutual funds managed by the Adviser are widely held. Servicing the Fund’s investors is more time consuming and labor intensive compared to institutional clients since the Adviser needs to communicate with a more extensive network of financial intermediaries and shareholders. The Adviser also

believes that it incurs substantial entrepreneurial risk when offering a new mutual fund since establishing a new mutual fund requires a large upfront investment and it may take a long time for the fund to achieve profitability since the fund must be priced to scale from inception in order to be competitive and assets are acquired one account at a time. In addition, managing the cash flow of an investment company may be more difficult than managing that of a stable pool of assets, such as an institutional account with little cash movement in either direction, particularly, if a fund is in net redemption and the Adviser is frequently forced to sell securities to raise cash for redemptions. However, managing a fund with positive cash flow may be easier at times than managing a stable pool of assets. Finally, in recent years, investment advisers have been sued by institutional clients and have suffered reputational damage both by the attendant publicity and outcomes other than complete victories. Accordingly, the legal and reputational risks associated with institutional accounts are greater than previously thought, although still not equal to those related to the mutual fund industry.

Notwithstanding the Adviser's view that managing an investment company is not comparable to managing other institutional accounts because the services provided are different, the Supreme Court has indicated consideration should be given to the advisory fees charged to institutional accounts with a similar investment style as the Fund.⁵ In addition to the AllianceBernstein institutional fee schedule, set forth below is what would

⁵ The Supreme Court stated that "courts may give such comparisons the weight that they merit in light of the similarities and differences between the services that the clients in question require, but the courts must be wary of inapt comparisons." Among the significant differences the Supreme Court noted that may exist between services provided to mutual funds and institutional accounts are "higher marketing costs." *Jones v. Harris* at 1428.

have been the effective advisory fee of the Fund had the AllianceBernstein institutional fee schedule been applicable to the Fund based on March 31, 2014 net assets:⁶

<u>Fund</u>	<u>Net Assets 3/31/14 (\$MIL)</u>	<u>AllianceBernstein Institutional Fee Schedule</u>	<u>Effective AB Inst. Adv. Fee</u>	<u>Fund Advisory Fee</u>
Global Value Fund	\$46.6	Global Value 0.80% on 1 st \$25 million 0.60% on next \$25 million 0.50% on next \$50 million 0.40% on next the balance <i>Minimum Account Size: \$25m</i>	0.707%	0.750%

The Adviser also manages and sponsors retail mutual funds, which are organized in jurisdictions outside the United States, generally Luxembourg and Japan, and sold to non-United States resident investors. The Adviser charges the fees set forth below for Global Value Portfolio, a Luxembourg fund that has a somewhat similar investment style as the Fund:

<u>Fund</u>	<u>Luxembourg</u>	<u>Fee⁷</u>
Global Value Fund	Global Value Portfolio Class A Class I (Institutional)	1.50% 0.70%

The Adviser represented that it does not provide any sub-advisory investment services to other investment companies that have a substantially similar investment style as the Fund.

⁶ The Adviser has indicated that with respect to institutional accounts with assets greater than \$300 million, it will negotiate a fee schedule. Discounts that are negotiated vary based upon each client relationship.

⁷ Class A shares of the funds are charged an “all-in” fee, which includes investment advisory services and distribution related services, unlike Class I shares, whose fee is for investment advisory services only.

II. MANAGEMENT FEES CHARGED BY OTHER MUTUAL FUND COMPANIES FOR LIKE SERVICES.

Lipper, Inc. (“Lipper”), an analytical service that is not affiliated with the Adviser, compared the fees charged to the Fund with fees charged to other investment companies for similar services offered by other investment advisers.⁸ Lipper’s analysis included the comparison of the Fund’s contractual management fee, estimated at the approximate current asset level of the Fund, to the median of the Fund’s Lipper Expense Group (“EG”) and the Fund’s contractual management fee ranking.^{9, 10}

Lipper describes an EG as a representative sample of comparable funds. Lipper’s standard methodology for screening funds to be included in an EG entails the consideration of several fund criteria, including fund type, investment classification/objective, load type and similar 12b-1/non-12b-1 service fees, asset (size) comparability, expense components and attributes. An EG will typically consist of seven to twenty funds.

The Fund’s original EG had an insufficient number of peers in Lipper’s view. Consequently, Lipper expanded the EG of the Fund to include peers that had a similar but not the same Lipper investment classification/objective.

⁸ The Supreme Court cautioned against accepting mutual fund fee comparisons without careful scrutiny since “these comparisons are problematic because these fees, like those challenged, may not be the product of negotiations conducted at arm’s length.” *Jones v. Harris* at 1429.

⁹ Lipper does not consider average account size when constructing EGs. Funds with relatively small average account sizes tend to have higher transfer agent expense ratio than comparable sized funds that have relatively large average account sizes. Note that there are limitations on Lipper expense category data because different funds categorize expenses differently.

¹⁰ The contractual management fee is calculated by Lipper using the Fund’s contractual management fee rate at a hypothetical asset level. The hypothetical asset level is based on the combined net assets of all classes of the Fund, rounded up to the next \$25 million. Lipper’s total expense ratio information is based on the most recent annual report except as otherwise noted. A ranking of “1” would mean that the Fund had the lowest effective fee rate in the Lipper peer group.

<u>Fund</u>	<u>Contractual Management Fee (%)</u> ¹¹	<u>Lipper EG Median (%)</u>	<u>Lipper EG Rank</u>
Global Value Fund ¹²	0.750	0.850	3/11

However, because Lipper had expanded the EG of the Fund, under Lipper’s standard guidelines, the Lipper Expense Universe (“EU”) was also expanded to include the universe of those peers that had a similar but not the same Lipper investment classification/objective. A “normal” EU will include funds that have the same investment classification/objective as the subject Fund.¹³

<u>Fund</u>	<u>Total Expense Ratio (%)</u> ¹⁴	<u>Lipper EG Median (%)</u>	<u>Lipper EG Rank</u>	<u>Lipper EU Median (%)</u>	<u>Lipper EU Rank</u>
Global Value Fund ¹⁵	2.193	1.500	11/11	1.425	26/26

Based on this analysis, the Fund has a more favorable ranking on a contractual management fee basis than on a total expense ratio basis.

III. COSTS TO THE ADVISER AND ITS AFFILIATES OF SUPPLYING SERVICES PURSUANT TO THE ADVISORY FEE ARRANGEMENT, EXCLUDING ANY INTRA-CORPORATE PROFIT.

The Adviser utilizes two profitability reporting systems, which operate independently but are aligned with each other, to estimate the Adviser’s profitability in connection with investment advisory services provided to the Fund. The Senior Officer

¹¹ The contractual management fee does not reflect any expense reimbursements made by the Fund to the Adviser for certain clerical, legal, accounting, administrative and other services.

¹² The Fund’s EG includes the Fund, three other Global Multi-Cap Value Funds (“GMLV”) and seven Global Multi-Cap Core Funds (“GMLC”).

¹³ Except for asset (size) comparability, Lipper uses the same criteria for selecting an EG peer when selecting an EU peer. Unlike the EG, the EU allows for the same adviser to be represented by more than just one fund.

¹⁴ The total expense ratios shown are for the Fund’s most recent fiscal year end Class A shares.

¹⁵ The Fund’s EU includes the Fund, EG and all other GMLV and GMLC, excluding outliers.

has retained a consultant to provide independent advice regarding the alignment of the two profitability systems as well as the methodologies and allocations utilized by both profitability systems. See Section IV for additional discussion.

IV. PROFIT MARGINS OF THE ADVISER AND ITS AFFILIATES FOR SUPPLYING SUCH SERVICES.

The Fund's profitability information, prepared by the Adviser for the Board of Trustees, was reviewed by the Senior Officer and the consultant. The Adviser's profitability from providing investment advisory services to the Fund decreased during calendar year 2013, relative to 2012.

In addition to the Adviser's direct profits from managing the Fund, certain of the Adviser's affiliates have business relationships with the Fund and may earn a profit from providing other services to the Fund. The courts have referred to this type of business opportunity as "fall-out benefits" to the Adviser and indicated that such benefits should be factored into the evaluation of the total relationship between the Fund and the Adviser. Neither case law nor common business practice precludes the Adviser's affiliates from earning a reasonable profit on this type of relationship provided the affiliates' charges and services are competitive and the relationship otherwise complies with the 40 Act restrictions. These affiliates provide transfer agent, distribution and brokerage related services to the Fund and receive transfer agent fees, Rule 12b-1 payments, front-end sales loads, contingent deferred sales charges ("CDSC") and brokerage commissions. In addition, the Adviser benefits from soft dollar arrangements which offset expenses the Adviser would otherwise incur.

AllianceBernstein Investments, Inc. ("ABI"), an affiliate of the Adviser, is the Fund's principal underwriter. ABI and the Adviser have disclosed in the Fund's

prospectus that they may make revenue sharing payments from their own resources, in addition to resources derived from sales loads and Rule 12b-1 fees, to firms that sell shares of the Fund. The total amount paid to a financial intermediary associated with the sale of shares will generally not exceed the sum of (a) 0.25% of the current year's fund sales by that firm and (b) 0.10% of the average daily net assets attributable to that firm over the year. In 2013, ABI paid approximately 0.05% of the average monthly assets of the AllianceBernstein Mutual Funds or approximately \$19.4 million for distribution services and educational support (revenue sharing payments).

During the Fund's most recently completed fiscal year, ABI received from the Fund \$614, \$98,894 and \$964 in front-end sales charges, Rule 12b-1 and CDSC fees, respectively.

Fees and reimbursements for out of pocket expenses charged by AllianceBernstein Investor Services, Inc. ("ABIS"), the affiliated transfer agent for the Fund, are charged on a per account basis, based on the level of service provided and the class of share held by the account. ABIS also receives a fee per shareholder sub-account for each account maintained by an intermediary on an omnibus basis. During the Fund's most recently completed fiscal year, ABIS received \$32,323 in fees from the Fund.

The Fund effected brokerage transactions through the Adviser's affiliate, Sanford C. Bernstein & Co., LLC ("SCB & Co.") and/or its U.K. affiliate, Sanford C. Bernstein Limited ("SCB Ltd."), collectively "SCB," and paid commissions during the most recently completed fiscal year. The Adviser represented that SCB's profitability from any business conducted with the Fund is comparable to the profitability of SCB's dealings with other similar third party clients. In the ordinary course of business, SCB

receives and pays liquidity rebates from electronic communications networks (“ECNs”) derived from trading for its clients. These credits and charges are not being passed onto any SCB client. The Adviser also receives certain soft dollar benefits from brokers that execute agency trades for its clients. These soft dollar benefits reduce the Adviser’s cost of doing business and increase its profitability.

V. POSSIBLE ECONOMIES OF SCALE

The Adviser has indicated that economies of scale are being shared with shareholders through pricing to scale, breakpoints, fee reductions/waivers and enhancement to services.

In May 2012, an independent consultant, retained by the Senior Officer, provided the Board of Trustees information on the Adviser’s firm-wide average costs from 2005 through 2011 and the potential economies of scale. The independent consultant noted that from 2005 through 2007 the Adviser experienced significant growth in assets under management (“AUM”). During this period, operating expenses increased, in part to keep up with growth, and in part reflecting market returns. However, from 2008 through the first quarter of 2009, AUM rapidly and significantly decreased due to declines in market value and client withdrawals. When AUM rapidly decreased, some operating expenses categories, including base compensation and office space, adjusted more slowly during this period, resulting in an increase in average costs. Since 2009, AUM has experienced less significant changes. The independent consultant noted that changes in operating expenses reflect changes in business composition and business practices in response to changes in financial markets. Finally, the independent consultant concluded that the increase in average cost and the decline in net operating margin across the Adviser since

late 2008 are inconsistent with the view that there are currently reductions in average costs due to economies of scale that can be shared with the AllianceBernstein Mutual Funds managed by the Adviser through lower fees.

Previously, in February 2008, the independent consultant provided the Board of Trustees an update of the Deli¹⁶ study on advisory fees and various fund characteristics.¹⁷ The independent consultant first reiterated the results of his previous two dimensional comparison analysis (fund size and family size) with the Board of Trustees.¹⁸ The independent consultant then discussed the results of the regression model that was utilized to study the effects of various factors on advisory fees. The regression model output indicated that the bulk of the variation in fees predicted were explained by various factors, but substantially by fund AUM, family AUM, index fund indicator and investment style. The independent consultant also compared the advisory fees of the AllianceBernstein Mutual Funds to similar funds managed by 19 other large asset managers, regardless of the fund size and each Adviser's proportion of mutual fund assets to non-mutual fund assets.

¹⁶ The Deli study, originally published in 2002 based on 1997 data and updated for the February 2008 Presentation, may be of diminished value due to the age of the data used in the presentation and the changes experienced in the industry over the last four years.

¹⁷ As mentioned previously, the Supreme Court cautioned against accepting mutual fund fee comparisons without careful scrutiny since the fees may not be the product of negotiations conducted at arm's length. See *Jones V. Harris* at 1429.

¹⁸ The two dimensional analysis showed patterns of lower advisory fees for funds with larger asset sizes and funds from larger family sizes compared to funds with smaller asset sizes and funds from smaller family sizes, which according to the independent consultant is indicative of a sharing of economies of scale and scope. However, in less liquid and active markets, such is not the case, as the empirical analysis showed potential for diseconomies of scale in those markets. The empirical analysis also showed diminishing economies of scale and scope as funds surpassed a certain high level of assets.

VI. NATURE AND QUALITY OF THE ADVISER’S SERVICES,
INCLUDING THE PERFORMANCE OF THE FUND

With assets under management of approximately \$454 billion as of March 31, 2014, the Adviser has the investment experience to manage and provide non-investment services (described in Section I) to the Fund.

The information prepared by Lipper shows the 1, 3, 5 and 10 year performance returns and rankings of the Fund¹⁹ relative to its Lipper Performance Universe (“PU”)²⁰ for the periods ended February 28, 2014.²¹

	<u>Fund (%)</u>	<u>PG Median (%)</u>	<u>PU Median (%)</u>	<u>PG Rank</u>	<u>PU Rank</u>
1 year	25.93	21.74	21.72	1/4	2/13
3 year	5.66	7.19	9.76	4/4	10/11
5 year	18.63	18.63	18.65	2/3	6/10
10 year	3.82	6.18	6.31	3/3	7/7

Set forth below are the 1, 3, 5, 10 year and since inception performance returns of the Fund (in bold)²² versus its benchmark.²³ Fund and benchmark volatility and reward-to-variability ratio (“Sharpe Ratio”) information is also shown.²⁴

Periods Ending February 28, 2014
Annualized Performance

¹⁹ The performance rankings are for the Class A shares of the Fund. The Fund’s performance returns shown were provided by Lipper.

²⁰ The Fund’s PG/PU is not identical to the Fund’s EG/EU as the criteria for including/excluding a fund in a PG/PU is somewhat different from that of an EG/EU.

²¹ Lipper investment classification/objective dictates the PU throughout the life of the fund even if a fund had a different investment classification/objective at a different point in time.

²² The performance returns and risk measures shown in the table are for the Class A shares of the Fund.

²³ The Adviser provided Fund and benchmark performance return information for periods through February 28, 2014.

²⁴ Fund and benchmark volatility and Sharpe Ratio information was obtained through Lipper LANA, a database maintained by Lipper. Volatility is a statistical measure of the tendency of a market price or yield to vary over time. The Sharpe Ratio is a risk adjusted measure of return that divides a fund’s return in excess of the riskless return by the fund’s standard deviation. A fund with a greater volatility would be viewed as more risky than a fund with equivalent performance but lower volatility; for that reason, a greater return would be demanded for the more risky fund. A fund with a higher Sharpe Ratio would be viewed as better performing than a fund with a lower Sharpe Ratio.

	<u>1</u> Year (%)	<u>3</u> Year (%)	<u>5</u> Year (%)	<u>10</u> Year (%)	Since Inception (%)	Annualized Volatility (%)	Sharpe (%)	Risk Period (Year)
Global Value Fund	25.93	5.66	18.63	3.82	4.13	20.05	0.21	10
MSCI World Index (Net)	21.68	9.81	19.98	6.75	5.62	16.02	0.39	10

Inception Date: March 29, 2001

CONCLUSION:

Based on the factors discussed above the Senior Officer's conclusion is that the proposed advisory fee for the Fund is reasonable and within the range of what would have been negotiated at arm's-length in light of all the surrounding circumstances. This conclusion in respect of the Fund is based on an evaluation of all of these factors and no single factor was dispositive.

Dated: June 5, 2014

THIS PAGE IS INTENTIONALLY LEFT BLANK.

SUMMARY OF SENIOR OFFICER'S EVALUATION OF INVESTMENT ADVISORY AGREEMENT¹

The following is a summary of the evaluation of the Investment Advisory Agreement between AllianceBernstein L.P. (the "Adviser") and the AllianceBernstein Trust, Inc. (the "Trust") in respect of AllianceBernstein Global Value Fund (the "Fund").² The evaluation of the Investment Advisory Agreement was prepared by Philip L. Kirstein, the Senior Officer of the Fund, for the Trustees of the Fund, as required by a September 2004 agreement between the Adviser and the New York State Attorney General (the "NYAG"). The Senior Officer's evaluation of the Investment Advisory Agreement is not meant to diminish the responsibility or authority of the Board of Trustees of the Fund to perform its duties pursuant to Section 15 of the Investment Company Act of 1940 (the "40 Act") and applicable state law. The purpose of the summary is to provide shareholders with a synopsis of the independent evaluation of the reasonableness of the advisory fees proposed to be paid by the Fund which was provided to the Trustees in connection with their review of the proposed approval of the continuance of the Investment Advisory Agreement. The Senior Officer's evaluation considered the following factors:

1. Advisory fees charged to institutional and other clients of the Adviser for like services;
2. Advisory fees charged by other mutual fund companies for like services;

¹ The information in the fee summary was completed on April 22, 2013 and discussed with the Board of Trustees on April 30-May 2, 2013.

² Future references to the Fund do not include "AllianceBernstein." References in the fee summary pertaining to performance and expense ratio rankings refer to the Class A shares of the Fund.

3. Costs to the Adviser and its affiliates of supplying services pursuant to the advisory agreement, excluding any intra-corporate profit;
4. Profit margins of the Adviser and its affiliates from supplying such services;
5. Possible economies of scale as the Fund grows larger; and
6. Nature and quality of the Adviser's services including the performance of the Fund.

These factors, with the exception of the first factor, are generally referred to as the “*Gartenberg* factors,” which were articulated by the United States Court of Appeals for the Second Circuit in 1982. *Gartenberg v. Merrill Lynch Asset Management, Inc.*, 694 F. 2d 923 (2d Cir. 1982). The first factor is an additional factor required to be considered by the AoD. On March 30, 2010, the Supreme Court held the *Gartenberg* decision was correct in its basic formulation of what §36(b) requires: to face liability under §36(b), “an investment adviser must charge a fee that is so disproportionately large that it bears no reasonable relationship to the services rendered and could not have been the product of arm’s length bargaining.” *Jones v. Harris Associates L.P.*, 130 S. Ct. 1418 (2010). In the *Jones* decision, the Court stated the *Gartenberg* approach fully incorporates the correct understanding of fiduciary duty within the context of section 36(b) and noted with approval that “*Gartenberg* insists that all relevant circumstances be taken into account” and “uses the range of fees that might result from arm’s-length bargaining as the benchmark for reviewing challenged fees.”³

³ *Jones v. Harris* at 1427.

FUND ADVISORY FEES, NET ASSETS, & EXPENSE RATIOS

The Adviser proposed that the Fund pays the advisory fee set forth in the table below for receiving the services to be provided pursuant to the Investment Advisory Agreement. The fee schedule below, implemented in January 2004 in consideration of the Adviser's settlement with the NYAG in December 2003, is based on a master schedule that contemplates eight categories of funds with almost all funds in each category having the same advisory fee schedule.⁴

<u>Category</u>	<u>Advisory Fee</u> ⁵	Net Assets 03/31/13 <u>(\$MIL)</u>	<u>Fund</u>
International	0.75% on 1 st \$2.5 billion 0.65% on next \$2.5 billion 0.60% on the balance	\$42.3	Global Value Fund

The Adviser is reimbursed as specified in the Investment Advisory Agreement for certain clerical, legal, accounting, administrative and other services provided to the Fund. During the Fund's most recently completed fiscal year, the Adviser received \$56,606 (0.096% of the Fund's average daily net assets) for such services.

Set forth below are the Fund's total expense ratios for the most recently completed fiscal year:

⁴ Most of the AllianceBernstein Mutual Funds, which the Adviser manages, were affected by the Adviser's settlement with the NYAG.

⁵ The advisory fee of the Fund is based on the percentage of the Fund's average daily net assets and is paid on a monthly basis.

<u>Fund</u>	<u>Total Expense Ratio</u>		<u>Fiscal Year End</u>
Global Value Fund	Advisor	1.85%	November 30
	Class A	2.16%	
	Class B	2.96%	
	Class C	2.89%	
	Class R	2.35%	
	Class K	2.11%	
	Class I	1.43%	

I. MANAGEMENT FEES CHARGED TO INSTITUTIONAL AND OTHER CLIENTS

The advisory fees charged to investment companies which the Adviser manages and sponsors are normally higher than those charged to similar sized institutional accounts, including pension plans and sub-advised investment companies. The fee differential reflects, among other things, different services provided to such clients, and different liabilities assumed. Services provided by the Adviser to the Fund that are not provided to non-investment company clients and sub-advised investment companies include providing office space and personnel to serve as Fund Officers, who among other responsibilities make the certifications required under the Sarbanes–Oxley Act of 2002, and coordinating with and monitoring the Fund’s third party service providers such as Fund counsel, auditors, custodians, transfer agents and pricing services. The accounting, administrative, legal and compliance requirements for the Fund are more costly than those for institutional assets due to the greater complexities and time required for investment companies, although as previously noted, the Adviser is reimbursed for providing such services. Also, retail mutual funds managed by the Adviser are widely held. Servicing the Fund’s investors is more time consuming and labor intensive compared to institutional clients since the Adviser needs to communicate with a more extensive network of financial intermediaries and shareholders. The Adviser also

believes that it incurs substantial entrepreneurial risk when offering a new mutual fund since establishing a new mutual fund requires a large upfront investment and it may take a long time for the fund to achieve profitability since the fund must be priced to scale from inception in order to be competitive and assets are acquired one account at a time. In addition, managing the cash flow of an investment company may be more difficult than managing that of a stable pool of assets, such as an institutional account with little cash movement in either direction, particularly, if a fund is in net redemption and the Adviser is frequently forced to sell securities to raise cash for redemptions. However, managing a fund with positive cash flow may be easier at times than managing a stable pool of assets. Finally, in recent years, investment advisers have been sued by institutional clients and have suffered reputational damage both by the attendant publicity and outcomes other than complete victories. Accordingly, the legal and reputational risks associated with institutional accounts are greater than previously thought, although still not equal to those related to the mutual fund industry.

Notwithstanding the Adviser's view that managing an investment company is not comparable to managing other institutional accounts because the services provided are different, the Supreme Court has indicated consideration should be given to the advisory fees charged to institutional accounts with a similar investment style as the Fund.⁶ In addition to the AllianceBernstein institutional fee schedule, set forth below is what would

⁶ The Supreme Court stated that "courts may give such comparisons the weight that they merit in light of the similarities and differences between the services that the clients in question require, but the courts must be wary of inapt comparisons." Among the significant differences the Supreme Court noted that may exist between services provided to mutual funds and institutional accounts are "higher marketing costs." *Jones v. Harris* at 1428.

have been the effective advisory fee of the Fund had the AllianceBernstein institutional fee schedule been applicable to the Fund based on March 31, 2013 net assets:⁷

<u>Fund</u>	<u>Net Assets</u> 3/31/13 (\$MIL)	<u>AllianceBernstein Institutional</u> <u>Fee Schedule</u>	<u>Effective</u> AB Inst. <u>Adv. Fee</u>	<u>Fund</u> Advisory <u>Fee</u>
Global Value Fund	\$42.3	Global Value 0.80% on 1 st \$25 million 0.60% on next \$25 million 0.50% on next \$50 million 0.40% on the balance <i>Minimum Account Size: \$25 m</i>	0.718%	0.750%

The Adviser also manages and sponsors retail mutual funds, which are organized in jurisdictions outside the United States, generally Luxembourg and Japan, and sold to non-United States resident investors. The Adviser charges the fees set forth below for Global Value Portfolio, which is a Luxembourg fund that has a somewhat similar investment style as the Fund:

<u>Fund</u>	<u>Luxembourg</u>	<u>Fee</u> ⁸
Global Value Fund	Global Value Portfolio Class A Class I (Institutional)	1.50% 0.70%

The Adviser represented that it does not provide any sub-advisory investment services to other investment companies that have a substantially similar investment style as the Fund.

⁷ The Adviser has indicated that with respect to institutional accounts with assets greater than \$300 million, it will negotiate a fee schedule. Discounts that are negotiated vary based upon each client relationship.

⁸ Class A shares of the funds are charged an “all-in” fee, which includes investment advisory services and distribution related services, unlike Class I shares, whose fee is for investment advisory services only.

II. MANAGEMENT FEES CHARGED BY OTHER MUTUAL FUND COMPANIES FOR LIKE SERVICES.

Lipper, Inc. (“Lipper”), an analytical service that is not affiliated with the Adviser, compared the fees charged to the Fund with fees charged to other investment companies for similar services offered by other investment advisers.⁹ Lipper’s analysis included the comparison of the Fund’s contractual management fee, estimated at the approximate current asset level of the Fund, to the median of the Fund’s Lipper Expense Group (“EG”) and the Fund’s contractual management fee ranking.^{10, 11}

Lipper describes an EG as a representative sample of comparable funds. Lipper’s standard methodology for screening funds to be included in an EG entails the consideration of several fund criteria, including fund type, investment classification/objective, load type and similar 12b-1/non-12b-1 service fees, asset (size) comparability, expense components and attributes. An EG will typically consist of seven to twenty funds.

The Fund’s original EG had an insufficient number of peers in Lipper’s view. Consequently, Lipper expanded the EG of the Fund to include peers that had a similar but not the same Lipper investment classification/objective.

⁹ The Supreme Court cautioned against accepting mutual fund fee comparisons without careful scrutiny since “these comparisons are problematic because these fees, like those challenged, may not be the product of negotiations conducted at arm’s length.” *Jones v. Harris* at 1429.

¹⁰ Lipper does not consider average account size when constructing EGs. Funds with relatively small average account sizes tend to have higher transfer agent expense ratio than comparable sized funds that have relatively large average account sizes. Note that there are limitations on Lipper expense category data because different funds categorize expenses differently.

¹¹ The contractual management fee is calculated by Lipper using the Fund’s contractual management fee rate at a hypothetical asset level. The hypothetical asset level is based on the combined net assets of all classes of the Fund, rounded up to the next \$25 million. Lipper’s total expense ratio information is based on the most recent annual report except as otherwise noted. A ranking of “1” would mean that the Fund had the lowest effective fee rate in the Lipper peer group.

<u>Fund</u>	<u>Contractual Management Fee (%)</u> ¹²	<u>Lipper EG Median (%)</u>	<u>Lipper EG Rank</u>
Global Value Fund ¹³	0.750	0.835	2/10

However, because Lipper had expanded the EG of the Fund, under Lipper’s standard guidelines, the Lipper Expense Universe (“EU”) was also expanded to include the universe of those peers that had a similar but not the same Lipper investment classification/objective. A “normal” EU will include funds that have the same investment classification/objective as the subject Fund.¹⁴

<u>Fund</u>	<u>Total Expense Ratio (%)</u> ¹⁵	<u>Lipper EG Median (%)</u>	<u>Lipper EG Rank</u>	<u>Lipper EU Median (%)</u>	<u>Lipper EU Rank</u>
Global Value Fund ¹⁶	2.146	1.525	10/10	1.352	23/23

Based on this analysis, the Fund has a more favorable ranking on a contractual management fee basis than on a total expense ratio basis.

III. COSTS TO THE ADVISER AND ITS AFFILIATES OF SUPPLYING SERVICES PURSUANT TO THE ADVISORY FEE ARRANGEMENT, EXCLUDING ANY INTRA-CORPORATE PROFIT.

The Adviser utilizes two profitability reporting systems, which operate independently but are aligned with each other, to estimate the Adviser’s profitability in connection with investment advisory services provided to the Fund. The Senior Officer

¹² The contractual management fee does not reflect any expense reimbursements made by the Fund to the Adviser for certain clerical, legal, accounting, administrative and other services.

¹³ The Fund’s EG includes the Fund, three other Global Multi-Cap Value Funds (“GMLV”) and six Global Multi-Cap Core Funds (“GMLC”).

¹⁴ Except for asset (size) comparability, Lipper uses the same criteria for selecting an EG peer when selecting an EU peer. Unlike the EG, the EU allows for the same adviser to be represented by more than just one fund.

¹⁵ The total expense ratios shown are for the Fund’s most recent fiscal year end Class A shares.

¹⁶ The Fund’s EU includes the Fund, EG and all other GMLV and GMLC, excluding outliers.

has retained a consultant to provide independent advice regarding the alignment of the two profitability systems as well as the methodologies and allocations utilized by both profitability systems. See Section IV for additional discussion.

IV. PROFIT MARGINS OF THE ADVISER AND ITS AFFILIATES FOR SUPPLYING SUCH SERVICES.

The Fund's profitability information, prepared by the Adviser for the Board of Trustees, was reviewed by the Senior Officer and the consultant. The Adviser's profitability from providing investment advisory services to the Fund decreased during calendar year 2012, relative to 2011.

In addition to the Adviser's direct profits from managing the Fund, certain of the Adviser's affiliates have business relationships with the Fund and may earn a profit from providing other services to the Fund. The courts have referred to this type of business opportunity as "fall-out benefits" to the Adviser and indicated that such benefits should be factored into the evaluation of the total relationship between the Fund and the Adviser. Neither case law nor common business practice precludes the Adviser's affiliates from earning a reasonable profit on this type of relationship provided the affiliates' charges and services are competitive and the relationship otherwise complies with the 40 Act restrictions. These affiliates provide transfer agent, distribution and brokerage related services to the Fund and receive transfer agent fees, Rule 12b-1 payments, front-end sales loads, contingent deferred sales charges ("CDSC") and brokerage commissions. In addition, the Adviser benefits from soft dollar arrangements which offset expenses the Adviser would otherwise incur.

AllianceBernstein Investments, Inc. ("ABI"), an affiliate of the Adviser, is the Fund's principal underwriter. ABI and the Adviser have disclosed in the Fund's

prospectus that they may make revenue sharing payments from their own resources, in addition to resources derived from sales loads and Rule 12b-1 fees, to firms that sell shares of the Fund. In 2012, ABI paid approximately 0.05% of the average monthly assets of the AllianceBernstein Mutual Funds or approximately \$19 million for distribution services and educational support (revenue sharing payments).

During the Fund's most recently completed fiscal year, ABI received from the Fund \$239, \$108,402 and \$1,585 in front-end sales charges, Rule 12b-1 and CDSC fees, respectively.

Fees and reimbursements for out of pocket expenses charged by AllianceBernstein Investor Services, Inc. ("ABIS"), the affiliated transfer agent for the Fund, are charged on a per account basis, based on the level of service provided and the class of share held by the account. ABIS also receives a fee per shareholder sub-account for each account maintained by an intermediary on an omnibus basis. During the Fund's most recently completed fiscal year, ABIS received \$42,926 in fees from the Fund.

The Fund effected brokerage transactions through the Adviser's affiliate, Sanford C. Bernstein & Co., LLC ("SCB & Co.") and/or its U.K. affiliate, Sanford C. Bernstein Limited ("SCB Ltd."), collectively "SCB," and paid commissions during the most recently completed fiscal year. The Adviser represented that SCB's profitability from any business conducted with the Fund is comparable to the profitability of SCB's dealings with other similar third party clients. In the ordinary course of business, SCB receives and pays liquidity rebates from electronic communications networks ("ECNs") derived from trading for its clients. These credits and charges are not being passed onto any SCB client, including the Fund. The Adviser also receives certain soft dollar benefits

from brokers that execute agency trades for its clients. These soft dollar benefits reduce the Adviser's cost of doing business and increase its profitability.

V. POSSIBLE ECONOMIES OF SCALE

The Adviser has indicated that economies of scale are being shared with shareholders through pricing to scale, breakpoints, fee reductions/waivers and enhancement to services.

In May 2012, an independent consultant, retained by the Senior Officer, provided the Board of Trustees information on the Adviser's firm-wide average costs from 2005 through 2011 and the potential economies of scale. The independent consultant noted that from 2005 through 2007 the Adviser experienced significant growth in assets under management ("AUM"). During this period, operating expenses increased, in part to keep up with growth, and in part reflecting market returns. However, from 2008 through the first quarter of 2009, AUM rapidly and significantly decreased due to declines in market value and client withdrawals. When AUM rapidly decreased, some operating expenses categories, including base compensation and office space, adjusted more slowly during this period, resulting in an increase in average costs. Since 2009, AUM has experienced less significant changes. The independent consultant noted that changes in operating expenses reflect changes in business composition and business practices in response to changes in financial markets. Finally, the independent consultant concluded that the increase in average cost and the decline in net operating margin across the Adviser since late 2008 are inconsistent with the view that there are currently reductions in average costs due to economies of scale that can be shared with the AllianceBernstein Mutual Funds managed by the Adviser through lower fees.

Previously, in February 2008, the independent consultant provided the Board of Trustees an update of the Deli¹⁷ study on advisory fees and various fund characteristics.¹⁸ The independent consultant first reiterated the results of his previous two dimensional comparison analysis (fund size and family size) with the Board of Trustees.¹⁹ The independent consultant then discussed the results of the regression model that was utilized to study the effects of various factors on advisory fees. The regression model output indicated that the bulk of the variation in fees predicted were explained by various factors, but substantially by fund AUM, family AUM, index fund indicator and investment style. The independent consultant also compared the advisory fees of the AllianceBernstein Mutual Funds to similar funds managed by 19 other large asset managers, regardless of the fund size and each Adviser's proportion of mutual fund assets to non-mutual fund assets.

VI. NATURE AND QUALITY OF THE ADVISER'S SERVICES, INCLUDING THE PERFORMANCE OF THE FUND

With assets under management of approximately \$433 billion as of March 31, 2013, the Adviser has the investment experience to manage and provide non-investment services (described in Section I) to the Fund.

¹⁷ The Deli study, originally published in 2002 based on 1997 data and updated for the February 2008 Presentation, may be of diminished value due to the age of the data used in the presentation and the changes experienced in the industry over the last four years.

¹⁸ As mentioned previously, the Supreme Court cautioned against accepting mutual fund fee comparisons without careful scrutiny since the fees may not be the product of negotiations conducted at arm's length. See *Jones V. Harris* at 1429.

¹⁹ The two dimensional analysis showed patterns of lower advisory fees for funds with larger asset sizes and funds from larger family sizes compared to funds with smaller asset sizes and funds from smaller family sizes, which according to the independent consultant is indicative of a sharing of economies of scale and scope. However, in less liquid and active markets, such is not the case, as the empirical analysis showed potential for diseconomies of scale in those markets. The empirical analysis also showed diminishing economies of scale and scope as funds surpassed a certain high level of assets.

The information prepared by Lipper shows the 1, 3, 5 and 10 year performance returns and rankings of the Fund²⁰ relative to its Lipper Performance Universe (“PU”)²¹ for the periods ended February 28, 2013.²²

	<u>Fund (%)</u>	<u>PG Median (%)</u>	<u>PU Median (%)</u>	<u>PG Rank</u>	<u>PU Rank</u>
Global Value Fund					
1 year	6.05	8.99	9.91	4/4	11/14
3 year	4.37	7.54	8.26	4/4	11/12
5 year	-5.41	0.60	3.87	3/3	10/10
10 year	5.22	7.88	7.88	3/3	5/5

Set forth below are the 1, 3, 5, 10 year and since inception performance returns of the Fund (in bold)²³ versus its benchmark.²⁴ Fund and benchmark volatility and reward-to-variability ratio (“Sharpe Ratio”) information is also shown.²⁵

	Periods Ending February 28, 2013							Risk Period (Year)
	Annualized Performance							
	1 Year (%)	3 Year (%)	5 Year (%)	10 Year (%)	Since Inception (%)	Annualized Volatility (%)	Sharpe Ratio (%)	
Global Value Fund	6.05	4.37	-5.41	5.22	2.48	20.26	0.27	10
MSCI World Index (Net)	10.69	9.81	1.56	8.59	4.38	16.15	0.48	10

Inception Date: March 29, 2001

²⁰ The performance rankings are for the Class A shares of the Fund. The Fund’s performance returns shown were provided by Lipper.

²¹ The Fund’s PG/PU is not identical to the Fund’s EG/EU as the criteria for including/excluding a fund in a PG/PU is somewhat different from that of an EG/EU.

²² Lipper investment classification/objective dictates the PU throughout the life of the fund even if a fund had a different investment classification/objective at a different point in time.

²³ The performance returns and risk measures shown in the table are for the Class A shares of the Fund.

²⁴ The Adviser provided Fund and benchmark performance return information for periods through February 28, 2013.

²⁵ Fund and benchmark volatility and Sharpe Ratio information was obtained through Lipper LANA, a database maintained by Lipper. Volatility is a statistical measure of the tendency of a market price or yield to vary over time. The Sharpe Ratio is a risk adjusted measure of return that divides a fund’s return in excess of the riskless return by the fund’s standard deviation. A fund with a greater volatility would be viewed as more risky than a fund with equivalent performance but lower volatility; for that reason, a greater return would be demanded for the more risky fund. A fund with a higher Sharpe Ratio would be viewed as better performing than a fund with a lower Sharpe Ratio.

CONCLUSION:

Based on the factors discussed above the Senior Officer's conclusion is that the proposed advisory fee for the Fund is reasonable and within the range of what would have been negotiated at arm's-length in light of all the surrounding circumstances. This conclusion in respect of the Fund is based on an evaluation of all of these factors and no single factor was dispositive.

Dated: May 29, 2013
