

Tech Capital Solutions

Flexible, Scalable Private Capital Solutions For Growing Technology Businesses

AB Private Credit Investors' ("AB-PCI") dedicated TCS platform provides flexible financing solutions across the capital structure to growth-stage software and tech-enabled businesses, with equity financing ranging from \$10MM to \$25MM and credit from \$30MM to \$300MM

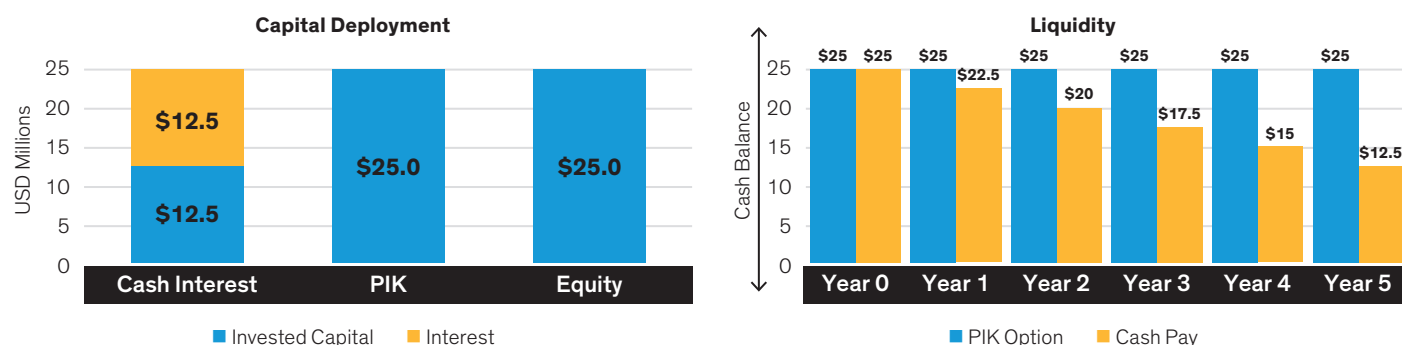

PIK 101

- Paid -in-kind (PIK) Financing allows high-growth companies to defer interest payments until loan maturity
- Interest payments add to the loan balance and are not paid until the loan comes due
- Instead of paying principal and interest in cash today, companies can use those funds for growth initiatives

Key Benefits of PIK

- Provides flexible capital, minimal dilution: Retain ownership while fueling growth
- Deploy capital where it matters most: If you borrow 100, you invest 100
- Preserve liquidity with deferred cash outflows: No interest and principal repayments during the PIK option period
- Maintain optionality: Borrower decides whether to apply Payment in Kind

PIK PRESERVES LIQUIDITY AND ENABLES EQUITY-LIKE GROWTH USING NON-DILUTIVE CAPITAL

- **Scenario:** company with \$50MM ARR, \$25MM cash, and 0% EBITDA raises \$25MM of capital
- By year 5, the Cash Interest option consumed 55% of the raised capital in interest payments
