Monthly Fact Sheet

**MVE-Class Review**

- In June, the Fund outperformed its benchmark, the S&P/ASX 300, which was up 0.92% in Australian-dollar terms.

**Contributors**

- The materials and healthcare sectors contributed the most to relative performance, while financials and utilities detracted.
- An underweight to mining company BHP contributed to relative results. BHP underperformed as iron ore fell on demand concerns in China.
- Diagnostic company Sonic Healthcare contributed as the market gained confidence in the forward earnings outlook following a period of elevated earnings volatility.
- Computer technology company Oracle contributed to results as the market reacted positively to a quarterly earnings report that showed a strong lift in cloud growth indicators, providing upside risk to near-term earnings growth.

**Detractors**

- A lack of exposure to major banks Commonwealth Bank of Australia and National Australia Bank detracted on limited news. The big four banks are now trading near all-time high price-to-earnings multiples, and we continue to believe that the forward earnings outlook does not justify current valuations.
- Royalty asset manager Deterra Royalties underperformed as it announced a bid to acquire UK-listed royalty company Trident and as iron ore fell on demand concerns in China.

**MVE-Class Change Highlights**

- During the month, we added shares of hearing implants company Cochlear as we are attracted by its strong balance sheet and robust earnings profile, which will benefit in the near term from a product upgrade cycle following the release of its next-generation hearing device.
- We rotated iron ore exposures, trimming our position in Deterra Royalties and adding shares of BHP as the relative risk/reward shifted.

## Performance Figures

In Australian dollars. Numbers may not sum due to rounding. The total, growth and distribution returns of the MVE-Class are net of fees and costs and do not allow for tax or inflation. Performance is calculated in accordance with the Financial Services Council Standard No. 6, using the relevant end-of-month exit prices, and assumes that income is reinvested and that the investment is held for the full period. The performance figures are historical and past performance is not necessarily an indication of future performance. The information above may change.

The Benchmark was changed to the S&P/ASX 300 Accumulation Index on 1 June 2019, and retrospectively to the MVE-Class's inception date of 31 March 2014. The MVE-Class's previous benchmarks are the S&P/ASX 300 Franking Credit Adjusted Daily Total Return Index (Tax-Exempt), which was effective 1 March 2016, and the FTSE ASFA Australia 300 Index–Tax Exempt, which was used for the period 31 March 2014 to 29 February 2016.
