#### Cost Basis Default Depletion Method

The Internal Revenue Service requires mutual funds to track cost basis for shares purchased on or after January 1, 2012 (covered shares). By default, covered shares will be depleted using the cost basis accounting method currently applied to the originating fund/accounts(s). All non-covered shares will be depleted before covered shares in a first-in first-out order, unless specific tax lots<sup>2</sup> are requested. If the originating fund/account(s) do not use Average Cost, a cost basis method can be specified for this redemption. To request a different depletion method or to identify specific tax lots<sup>2</sup> for depletion, include instructions in the box below or use a separate sheet.

Cost Basis Depletion Instructions (Optional)

<sup>1</sup>Withdrawal of mutual funds may be subject to a Contingent Deferred Sales Charge fee. See prospectus for details or contact Client Services at (800) 221 5672.

<sup>2</sup>If the originating fund/account uses Specific Lot Identification and you do not specify the lots, or if the available share amounts for the specified lots do not cover the transfer, a secondary cost basis accounting method will be used. If already existing on the account, the secondary method listed on the originating account will be used for depletion. If no secondary method is already existing, the first-in first-out method will be used.

## 4. Payment Method
