Credit Risk- A bond's credit rating reflects the issuer's ability to make timely payments of interest or principal—the lower the rating, the higher the risk of default. If the issuer's financial strength deteriorates, the issuer's rating may be lowered and the bond's value may decline.

Liquidity Risk - The difficulty of purchasing or selling a security at an advantageous time or price.

Foreign (non US) Risk - Non-US securities may be more volatile because of political, regulatory, market and economic uncertainties associated with such securities. Fluctuations in currency exchange risk may negatively affect the value of the investment or reduce returns. These risks are magnified in emerging or developing markets.

Interest Rate Risk - As interest rates rise, bond prices fall and vice versa - long-term securities tend to rise and fall more than short-term securities.
